**Subject:** Settlement Comments

The settlement is weak and ineffective. Microsoft still does not admit to wrong-doing and realizes that they will not be punished, only distracted.

This settlement will allow them to punish equipment manufactures at whim, give away software such as their browser putting other browser companies out of business, and dominate core technologies such as JAVA or ignore them out of existence.

We, as consumers, are losing and will find no remedy in this settlement.  
Break up the company.
